

Michigan Statewide Opinion Survey Voters Overwhelmingly Support Licensing and Inspecting Abortion Clinics

“To maintain the health and safety of the public, the State of Michigan requires facilities such as nursing homes, surgical centers and tattoo parlors to be licensed. However, Michigan law does not currently require most abortion facilities to be licensed. Without a license, state health officials are not able to inspect abortion facilities. Do you support or oppose legislation that would require all abortion facilities in Michigan to be licensed and inspected in order to protect the health and wellbeing of their patients?”
